

TAIS Series

CEE Series

**The structure covers an area of 1.800 smq.**

The large pool measures 25x13m, with a depth that varies from 1,20 to 1,80m. The small pool measures 10x6mt, and is 80cm deep. Outdoors there is also a pool measuring 16,66x10m and a depth of from 1,10 to 1,20m, and a second pool measuring 12x10m and a maximum depth of 80cm.

Albatros is affiliated with the FEDERAZIONE ITALIANA NUOTO (Italian Swimming Federation), and holds a Federal Swimming School license.

## RISK PROFILE

- Presence of chlorine vapours;
- Humid environment with splashing water;
- Public health and safety issues.

## THE SOLUTION

- The THERMOSETTING enclosure provides an excellent resistance against chlorine vapors;
- The IP67 protection rating allows the enclosures to resist against splashing water in complete safety;
- The TAIS system has double insulation to protect against direct contact with the live parts;
- The interlocking system, consisting in a steel bracket, guarantees the lack of power to the socket pins when the plug is removed.
